DIAGNOSTIC AND REPORTING PATH
EVALUATION-ONLY PATH
Observed telemetry
Task + legitimate installation metadata
Prepare and restrict
Quality checks; permitted history/channels
Deterministic diagnosis
Fixed policy; explicit unknown outcome
Evidence receipt
Decision, measurements, window, thresholds
Conversational report
Tool selection then receipt-grounded output
Reference labels
Injected causes; scoring only
Reference labels excluded from diagnostic inputs
Diagnostic scoring
Correctness, coverage, false positives, abstention
Reporting checks
Format, label fidelity, citation-name validity
